**We Keep
Bad Guys Out**

**Reinforce
Your IT Assets
Today!**

Zero Trust is a strategic approach to cybersecurity that secures an organization by eliminating implicit trust and continuously validating every stage of a digital interaction.

About us

TMBS is a USA-based leading Cyber Security and IT solutions company with presence in USA, India, Belize & Canada. We provide cybersecurity solutions for Web-Applications, Mobile-Applications, Endpoints and Servers. We not only work on finding the vulnerabilities in the present system but also help you in their remediation and in fortifying your IT assets against the potential attacks.

We have helped our customers assess their vulnerabilities and maturity in IT governance practices. Our expertise in assisting clients with their Disaster Recovery (DR) and Business Continuity (BCP) Plans has helped our clients design robust infrastructure and practices to recover in the fastest possible time. Over 80% client satisfaction in private and government ministries.

TMBS-WebSecure

Today Web Applications form the basis of the digital presence of an organization for many businesses, their web-based services and web-based stores are essential for their business continuity. TMBS-WebSecure helps you identify vulnerabilities and loopholes in your web applications based on OWASP recommendations. It enables you to protect against information and in some cases, revenue loss from attacks like SQL Injections, Cross-Site Scripting (XSS), Cross-Site Resource Forgery etc.

TMBS-Policy360

Modern organizations deal with massive amounts of data, diverse human resources, 24/7 uninterrupted service models and tons of compliances. Having IT management and IT governance policies to help in smoothly conducting day-to-day operations becomes essential. With our expertise in international IT governance and security standards like COBIT-19, NIST and CIS-Controls, we help organizations assess the maturity of their IT infrastructure and related policies. We also help them create robust Disaster Recovery, and Business Continuity plans to recover their businesses from catastrophic events.

TMBS-CloudSecure

In this age of cloud, organizations depend upon their cloud infrastructure for a significant part of their businesses. We help organizations assess their cloud infrastructure configurations for AWS, Google Cloud, Microsoft Azure, Digital Ocean and other cloud platforms. We also help them in deploying secure DevOps and Data Access practices to create a secure interaction between cloud resources and the organization's users.

TMBS-FortifyMe

A comprehensive vulnerability assessment and penetration testing solution to find potential vulnerabilities in your Internet-facing assets like firewalls and gateways. This service outlines the security risks with business impacts that could be exploited remotely over the Internet. This service is essential for modern businesses with a global presence, operating and exposing multiple resources and services over the internet.

TMBS-Internal Security 360

Today, organizations deal with massive amounts of data with different levels of sensitivity and confidentiality, along with different tools and services consuming them. It becomes essential to secure the IT assets within the organization's corporate network holding such data and resources. Our Internal Security 360 service helps you secure attack surfaces present within corporate networks by conducting vulnerability assessments and suggesting remediation.

TMBS-AppSecure

Does your organization rely on mobile applications (Android/iOS) for your business processes? Do your clients consume your services through your apps? Then TMBS-AppSecure is here to help you ensure that your apps and respective backend services are secure and free of vulnerabilities. We conduct Static analysis and code walkthroughs to ensure there are no vulnerabilities or potentially dangerous code patterns in the app. We also do Dynamic analysis to monitor for any malicious behaviors during runtime. After the analysis, our team of App development experts will help you fix the loopholes.

TMBS-Organization Security 360

This is a complete package of services previously mentioned, which helps organization secure all the different IT assets and attack surfaces right from Websites, Servers and Firewalls to Apps and Endpoints. This also includes IT infrastructure and policy maturity analysis. We recommend this service for organizations looking for 360-degree protection of their IT assets. We help organizations generate a complete roadmap to security. As a part of this, organizations may also take our help in the roadmap to establish their Security Operations Centre.
